

The screenshot shows a VS Code editor with the following components:

- File Explorer (Left Sidebar):** Displays a list of files in the 'AI ASSIGNMENTS' folder, including various PDF and HTML files. The file 'Assignment-14.2.html' is selected.
- Main Editor Area:** Shows the content of 'Assignment-14.2.html'. The code is an HTML document with a meta charset, a title 'My Product', and a body with a font family of 'Arial, sans-serif'. It includes a header/footer section with a background color of #f3f3f3, a color of #fff, and a padding of 1rem. A hero section has a padding of 2rem. A button has a padding of 0.5rem 1rem, a margin-top of 1rem, and a cursor of pointer.
- Bottom Panel:** Contains a terminal window showing the command prompt 'PS E:\User\Jashwanth\Desktop\AI ASSIGNMENTS>'.

OBSERVATION:

The page looks neat and well-structured with a header, hero section, and footer. It adjusts nicely on different devices, and the fonts make the text easy to read and pleasant to look at.

TASK-2:

PROMPT:

<!-- AI Prompt:

"Create a theme toggle button using JavaScript and ensure good color contrast for accessibility."

-->

CODE:

```
1 <!DOCTYPE html>
2 <html lang="en">
3 <head>
4 <meta charset="UTF-8">
5 <meta name="viewport" content="width=device-width, initial-scale=1.0">
6 <title>Mini Frontend Project</title>
7
8 <style>
9   body {
10     margin: 0;
11     font-family: Arial, sans-serif;
12     background-color: #f4f4f4;
13     transition: 0.3s;
14   }
15
16   /* Notification Bar */
17   .notification {
18     background-color: #ff9800;
19     color: #fff;
20     text-align: center;
21     padding: 5px;
22     position: relative;
23   }
24
25   .notification button {
26     margin-left: 10px;
27     padding: 5px 10px;
28     cursor: pointer;
29   }
30
31 </style>
32
33 <body>
34   <div class="notification">
35     This is a notification!
36     <button>Close</button>
37   </div>
38
39   <div class="main">
40     <div class="header">
41       <h2>My Product</h2>
42     </div>
43
44     <div class="content">
45       <h3>Welcome to Our Service</h3>
46       <p>We provide amazing solutions <img alt="rocket icon" data-bbox="540 480 550 490"/></p>
47       <button>Toggle Theme</button>
48     </div>
49
50     <div class="footer">
51       <p>© 2026 My Company</p>
52     </div>
53
54     <div class="feedback">
55       <h4>Feedback Form</h4>
56       <div>
57         <input type="text" value="Your Name"/>
58         <input type="text" value="Your Email"/>
59         <input type="text" value="Your Feedback"/>
60       </div>
61       <button>Submit</button>
62     </div>
63   </div>
64 </body>
65 </html>
```

OBSERVATION:

Clicking the button quickly switches between light and dark themes. This makes the page easier to use for everyone, and the smooth transition gives a modern, polished feel.

TASK-3:

85                                                      <div>
86                                                        <div>
87                                                          <div>
88                                                            <div>
89                                                              <div>
90                                                                <div>
91                                                                  <div>
92                                                                    <div>
93                                                                      <div>
94                                                                        <div>
95                                                                          <div>
96                                                                            <div>
97                                                                              <div>
98                                                                                <div>
99                                                                                  <div>
100                                         </div>
101                                       </div>
102                                     </div>
103                                   </div>
104                                 </div>
105                               </div>
106                             </div>
107                           </div>
108                         </div>
109                       </div>
110                     </div>
111                   </div>
112                 </div>
113               </div>
114             </div>
115           </div>
116         </div>
117       </div>
118     </div>
119
120    <script>
121      // Validation
122      function validateForm() {
123        let name = document.getElementById("name").value;
124        let rating = document.getElementById("rating").value;
125        let feedback = document.getElementById("feedback").value;
126
127        if (name === "" || rating === "" || feedback === "") {
128          alert("Please fill all fields");
129          return false;
130        }
131
132        // Success message
133        let successMessage = "Feedback submitted successfully!";
134        let successDiv = document.getElementById("success-message");
135        successDiv.innerHTML = successMessage;
136        successDiv.style.display = "block";
137
138        // Hide success message after 5 seconds
139        setTimeout(function() {
140          successDiv.innerHTML = "";
141          successDiv.style.display = "none";
142        }, 5000);
143      }
144
145      // Submit button click event
146      document.getElementById("submit").addEventListener("click", validateForm);
147    </script>
148  </body>
149 </html>
```

OBSERVATION:

The form checks that all required fields are filled before submission. If something is missing, it shows a clear error message, and if everything is correct, it shows a success message. This makes the form more user-friendly and prevents mistakes.

TASK-4:

PROMPT:

```
<!-- AI Prompt:
```

"Create an image gallery with next/previous buttons using

JavaScript and make it responsive."

 $\rightarrow$

CODE:

OBSERVATION:

The gallery lets you move through pictures using next and previous buttons. It works well on both computers and phones, making it easy and enjoyable to browse images.

TASK-5:

PROMPT:

<!-- AI Prompt:

"Create a notification banner with smooth show/hide

animation using JavaScript and CSS."

-->

CODE:

OBSERVATION:

The banner appears smoothly at the top of the page when triggered and hides again when dismissed. The animation makes it feel polished, and it's a handy way to show alerts or announcements without interrupting the rest of the page.
